Drop foliage wires.	
Fertigation Round 2.	
Cut back pine tree branches in Block 1.	
Repair two leaking submains.	
VITICULTURAL COMMENTS	
Wet days have continued in early October with five wet days and 26mm recorded. The wet conditions have made vineyard operation activities quite difficult, especially on the hilly ground. Water continues to seep out of the hilly ground and down from the paddocks above Block 5 making tractor driving extremely difficult delaying completion of some operations.
